

How to install USB driver

Install on Windows XP

1. Connect the USB port on HG3G series and the USB port on PC.
2. Windows displays “Found new Hardware Wizard”. Select “No, not this time” and press “Next” button.

3. Select “Install the software automatically (Recommended)” and press “Next” button.

4. Press "Continue Anyway".

[Note]

- Check the next section if installation is canceled without this dialog box. And try to install again.

- As the default of OS settings, "Hardware Installation" dialog box is displayed in this step. If "Hardware Installation" dialog box is not displayed, check Driver Signing Option.

- (1) Right-click "My Computer" on the desktop.
- (2) Select "Hardware" tab. Press "Device Signing" button.
- (3) Select "Warn – Prompt me each time to choose an action" and press OK button.
- (4) Install USB driver again.

- Windows displays a notification “Completing the Found New Hardware Wizard” if the installation has been succeeded.

Install on Windows7 32bit version

1. Connect the USB port on HG3G series and the USB port on PC.
2. Select Start – “Control Panel” – “System and Security” – “System” – “Device Manager” to Open Device Manager.
3. Right-click on “IDEC HG Series” in “Other devices” and select “Update Driver Software” in the right-click menu.

4. Select “Search automatically for updated driver software”.

5. Select "Install this driver software anyway".

6. Windows displays a notification "Windows has successfully updated your drive software" if installation has been succeeded.

Install on Windows7 64bit and Windows VISTA

1. Connect the USB port on HG3G series and the USB port on PC.

On Windows VISTA, Windows displays “Found New Hardware” dialog box. Select “Ask me again later”.

2. Open Device Manager.

Windows7: Start – “Control Panel” – “System and Security” – “System”
– “Device Manager”

Windows VISTA: Start – “Control Panel” – “System” – “Device Manager”

3. Right-click on “IDEC HG Series” in “Other devices” and select “Update Driver Software” in the right-click menu.

4. Select "Browse my computer for driver software".

5. Select the location to search for the driver from Browse button. And press OK button.

Driver file is included on the location "Driver\HG3G\Win7 64-bit" (Windows 7 64bit) and "Driver\HG3G\WinVISTA_7 32-bit" (Windows VISTA / 7 32bit) in Automation Organizer CD. And it can be downloaded from IDEC Web site (<http://www.idec.com/>).

6. Select "Install this driver software anyway".

7. Windows displays a notification “Windows has successfully updated your drive software” if the installation has been succeeded.

[Caution]

Do not uninstall USB driver on Windows7 64bit version. If uninstalling USB driver, delete the remaining USB driver file once and install it again as below.

1. Input “IDEC” to “Search program and files” in Start menu. Then oem**.ini (** is No.) is listed up.
2. Delete oem**.inf.
3. Install USB driver according to [“Install on Windows7 64bit and Windows VISTA”](#)
